## DOUB'S MEADOW PARK TRAIL

If you are looking for a short, easy trail to hike that would be an alternative to walking around a high school track, this is the trail for you.

Doub's Meadow Park, close to Myersville, is one of the newest parks in Frederick County. It currently has two baseball diamonds, and a soccer field. A paved walking trail is located around the edge of the park. The trail is about one half mile in length.

The trail does go beside the creek for a short distance and there are many trees to identify. We found several hickory nut trees loaded with nuts as well as a walnut tree.

In the winter, when the leaves are off the trees, you can see the wonderful stone bridge on Route 40 which was built in the 1940's when the road was realigned.
