FOR IMMEDIATE RELEASE:

Frederick County Agency Updates for October 14, 2021

Frederick, MD

Change in Response Organization:

**The Frederick County Joint Information Center (JIC) for COVID-19 is closing this week as the majority of updates are now from CDC, Maryland Department of Health, and the Frederick County Health Department (FCHD). Updates will continue to be sent weekly directly from FCHD. Statistics will continue to be updated weekdays at <http://FrederickCountyMD.gov/COVIDstats>.

FCHD would like to thank all the agencies that participated in the JIC, which began in March 2020 to ensure coordinated messaging from all Frederick County agencies.**

Level of Community Transmission in Frederick County, MD: [HIGH](#)

According to CDC, masks are recommended for everyone ([including fully vaccinated people](#)) in areas of substantial or high community transmission.

Maryland Department of Health Update

Monoclonal Antibody Treatment:

Monoclonal antibodies are laboratory-made proteins to fight the virus that causes COVID-19. Although it is not a cure, treatment may lessen the severity of symptoms and help keep high-risk patients out of the hospital.

Talk to your health care provider as soon as you test positive for COVID-19 so they can determine if monoclonal antibodies are the right treatment for you. Go to [new monoclonal antibody treatment website](#) for information on:

- Where treatment is available (other option: <https://covid.infusioncenter.org/>)
- Eligibility
- How treatment is initiated

Monoclonal Antibody Treatment for COVID-19

If you recently tested positive for COVID-19 or have been in close contact with a person with known or suspected COVID-19, you may be eligible to receive a free monoclonal antibody (mAb) treatment.

Trending Questions from Maryland Department of Health

I am over 65 years old, and I am not immunocompromised. Am I eligible to receive a booster shot?

Yes, if you received your second Pfizer dose at least six months ago, the CDC and Maryland Department of Health strongly recommends that you receive a booster shot.

Will there be a mobile vaccine initiative to administer booster shots for eligible recipients?

The State of Maryland has launched a vigorous outreach effort for those Marylanders who are currently eligible. State health officials are engaging directly with Maryland nursing homes and congregate care facilities, local health departments, primary care physicians, hospitals, pharmacies, and other providers.

Marylanders can contact 855-MDGOVAX (855-634-6829) to schedule your appointment today or visit covidvax.maryland.gov to find locations where Pfizer boosters are available.

Are the booster shot and 3rd vaccine dose the same thing?

While the formula of the vaccine is the same, doctors do make a distinction between a booster shot and a third dose. Doctors use the term third dose (additional dose) when referring to people with compromised immune systems who may not have gotten the level of protection they need from the first two doses. These are currently available for Marylanders who received either Moderna or Pfizer initial series.

Boosters are offered to people who got the full course of a vaccine and developed a good response initially, but it waned over time. These are currently available for certain Marylanders six months after an initial series of Pfizer.

Will I need to show a COVID-19 vaccine record card as proof of receiving the vaccine to receive a booster shot?

No, individuals may self-attest to eligibility. Providers shall not turn away any individual who self-attests to eligibility for a booster or additional dose.

Did you miss last week's questions?

You can find out the answer to other trending COVID-19 vaccination [questions at covidLink Trending Questions and Answers](#). Be sure to check out [covidLINK](#) for even more information on the COVID-19 vaccine, testing, and contact tracing.
