Test Kits & Masks at Libraries

Update on Free Masks and Test Kits:

All Frederick County Public Library branches have KN95 masks and test kits available inside the libraries during regular business hours. Supplies will be renewed when they run low. Visit fcpl.org for library branch hours and locations.

Reporting Positive Results

You can report positive test results either through the mobile app associated with your at-home test or through the Maryland COVID Positive At-Home Test Report Portal. Reporting positive results here will initiate the contact tracing process, which may be required to receive work or school excuse and release letters, which will help to keep others safe. Log in on the portal's home page to submit a report:

<https://covidlink.maryland.gov/selfreport>. If you do not have login information, you may register to create an account.

CDC Updates

Don't Delay. Test Soon and Treat Early

If you test positive for COVID-19 and have [one or more health conditions](#) that increase your risk of becoming very sick, treatment may be available.

Contact a health professional right away after a positive test to determine if you may be eligible, even if your symptoms are mild right now. Don't delay: Treatment must be started within the first few days to be effective.

Treatments used for COVID-19 should be prescribed by your healthcare provider. People have been [seriously harmed and even died](#) after taking products not approved for use to treat or prevent COVID-19, even products approved or prescribed for other uses. Talk to your healthcare provider about what option may be best for you.

How well do the current COVID-19 booster shots work against the Omicron variant?

COVID-19 vaccines are still the best way to protect yourself from COVID-19 and reduce the likelihood of new variants emerging. This includes primary series, booster shots and additional doses for those who need them. The current vaccines are expected to protect against severe illness, hospitalizations, and deaths due to the Omicron variant. However, some infections in people who are vaccinated may still occur. People who are up to date with their COVID-19 vaccines and get COVID-19, are less likely to develop serious illness than those who are unvaccinated.
