Currently Eligible

People in groups 1A, 1B, and 1C are currently eligible, but there is not enough vaccine for everyone who is eligible. Once your group is eligible, it continues to stay eligible.

Currently Vaccinating

Frederick County Health Department is currently vaccinating: **1A and 1B who live or work in Frederick County** and is prioritizing people 75+ and a minimum of 100 educators each week, according to guidance from the Maryland Department of Health.

- Thousands of people on the Vaccine Interest Form means it will take several weeks before you are contacted to schedule a vaccination appointment
- Please be patient and refrain from contacting the Health Department to receive a status update on when we will move to other priority groups and when you will be able to schedule your appointment.

Current Process

Anyone who lives or works in Frederick County who is interested in getting COVID-19 vaccine should complete the Vaccine Interest Form in the blue box on our [Vaccine webpage](#).

Completing this form does NOT make an appointment for you to get the vaccine.

- We will contact people who have registered on this form by priority group as we receive more vaccine.
- You will be contacted by the email you provide in the form. When you are contacted, you will need to register for your appointment online.
- **You only need to complete the form once.**
- It may be several days, weeks, or longer until you are contacted since it depends on vaccine availability.
- If you receive an email with a link to a clinic, please ***do not share that link***. Sharing or posting clinic links takes appointments away from people who are in higher priority groups and is not fair for others. Please be considerate of our community.
- ***NEW!!*** If you have already scheduled or received your 1st dose of vaccine, please [click this link](#) to unsubscribe from the list.

Frederick County Public Schools:

Air purifiers headed to FCPS classrooms: When students return as part of the instructional hybrid model, they will be learning in classrooms featuring air purifiers with HEPA filters.

FCPS purchased 2,500 air purifiers, which will provide an additional mitigation element for students and staff.

The FCPS Maintenance and Operations Department received 10 tractor trailer loads of air purifiers and distributed them to schools in two days. Dedicated school custodians are placing them in classrooms.

Many in the community have asked questions regarding air filtration in FCPS schools. We have [produced an informational video](#) that explains how FCPS controls air quality and air flow in school buildings. This information was shared in a [Find Out First message](#) on Feb. 4.
