### Frederick County Requests Community Input on COVID-19 Response

FREDERICK, MD – The COVID-19 pandemic had a big impact on our world, and Frederick County felt it, too. Our entire community played a part in protecting each other's health and safety. As we all continue to live and work each day in Frederick County, we want to better understand how we responded to the pandemic and what we can do better in the future.

We would like to hear from you through a community survey. Our goal is to gather your thoughts on Frederick County's response to COVID-19. Your input is important in understanding how our community has been affected by the pandemic and how we can work together to address challenges.

Participation in this survey is entirely voluntary and your responses are anonymous. Your feedback will help us to make data-driven decisions and develop strategies to help us improve our plans and respond better to future public health emergencies.
