

**Public Health**  
Prevent. Promote. Protect.

Frederick County Health Department

## *A message from our program:*

July 26, 2024

Dear Frederick County residents and pet owners,

**Rabies** is a serious concern that affects both humans and animals. As part of our commitment to community health and safety, we are launching a new quarterly series: "**Rabies Watch in Frederick County, MD.**"

### **What to Expect:**

- Information about wildlife encounters and preventive measures
- Pet Safety Tips: Guidance on how to protect your furry companions from rabies exposure
- Farm and livestock safety recommendations

 **Mark Your Calendars:** Our next posts will be released in October 2024, January 2025, and April 2025, covering essential information about rabies risk factors, vaccination schedules, and more!

 **Together, we can create a safer environment for our families and pets!**

Stay tuned and remember: **Vaccinate, Educate, and Advocate!**

Sincerely,

Frederick County Health Department  
Communicable Disease Infection Prevention Intervention Team
